PLANT TECHNOLOGY FOR ADVANCED CERAMICS

THE **Advanced Ceramics** NETWORK

Maschinenfabrik
Gustav Eirich GmbH & Co. KG

More than 100 years of experience
in material processing for technical and fine ceramic bodies
like honeycombs, ceramic rollers, membranes, filters, etc.

Mixing and kneading incl. batching and weighing technology
for complete automatic processing according to the specific formula.

State-of-the-art control technology
customized for perfect controlling and monitoring of the entire production
process.

Plant engineering and system concepts
individually designed for the specific customer requirements.

Worldwide after sales service & spare parts supply
with own service engineers for assembly,
commissioning and training.

MADE IN GERMANY
Hans Lingl Anlagenbau und
Verfahrenstechnik GmbH & Co. KG

Today Hans Lingl Anlagenbau & Verfahrenstechnik GmbH & Co. KG is the biggest independent and privately-run supplier of machinery and equipment for the ceramic materials industry. LINGL stands out for trend-setting innovation activities, reliability and high-quality workmanship.

We own particular know-how in the field of technical ceramics manufacturing technology, such like catalyst substrates, ceramic rollers, membranes, etc. In particular we are specialized in handling and drying technology for these complex and sensitive products. Together with our Advanced Ceramic Network partners we are able to design and set up complete manufacturing lines for technical ceramics.

ECT-KEMA GmbH

The ECT-KEMA company is one of the few enterprises around the globe which has the know-how to design, to develop and to produce machines and plants for the preparation and extrusion of products for fine and technical ceramics as well as extrudates for the chemical industry.

It is our goal to strengthen our position as technology leader in extrusion of ceramic and related masses, to improve permanently our machines in concept and detail and to develop together with our customers and partners innovative solutions for the long-term benefit of our customers.

Keramischer OFENBAU GmbH

Keramischer OFENBAU GmbH stands for the state-of-the art firing technology. Our kiln plants are individually designed to the need of our technical ceramics customers. We are innovative and at the same time we are an experienced German kiln building company. Our focus is on benchmarking energy saving technologies as our EnerViT firing technology.

For technical ceramics, Keramischer OFENBAU's advanced technology and customized solutions are combined with the proven reliability by full service around the kiln, as online service, spare parts supply and after sales service.

YOUR SOLUTION PROVIDERS

YOUR SOLUTION PROVIDERS

The Advanced Ceramics Network is a work group of German companies with unique know-how in machinery and plant engineering for the production of technical ceramics of highest quality.

In alliance with experts for materials research and quality control we create reliable plants with outstanding performance.
